

Account Aggregation – Mobile

As part of your enrollment in digital banking, you can get a big-picture view of your finances with just your Salal login by taking advantage of Account Aggregation. This handy feature saves you time and provides a convenient way to keep track of credit card, loan, brokerage, checking, and savings accounts at many financial institutions within Salal digital banking. Below, we've provided easy to follow instructions to help you get started today.

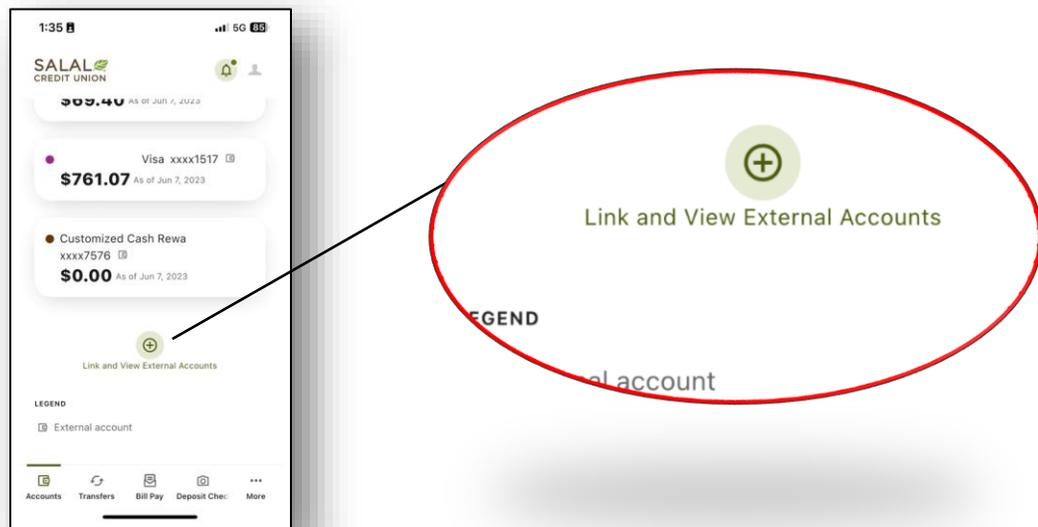

If you're interested in being able to transfer to and from your accounts at other financial institutions, be sure to check out the "**Transfer from Account to Account**" tutorial [here](#).

Pro Tips Before You Start

- Gather login information for each financial institution you'd like to use with Account Aggregation.
- Be sure you have access to a device you can receive any authorization codes your other financial institution may need to send as part of their verification process.
- While most financial institutions are available to link, there may be smaller institutions that have not adopted this technology and won't be available to view.

Getting Started

Log in to your Salal mobile app and scroll to the bottom of your **Accounts** list. Tap the plus icon to **Link and View External Accounts**.

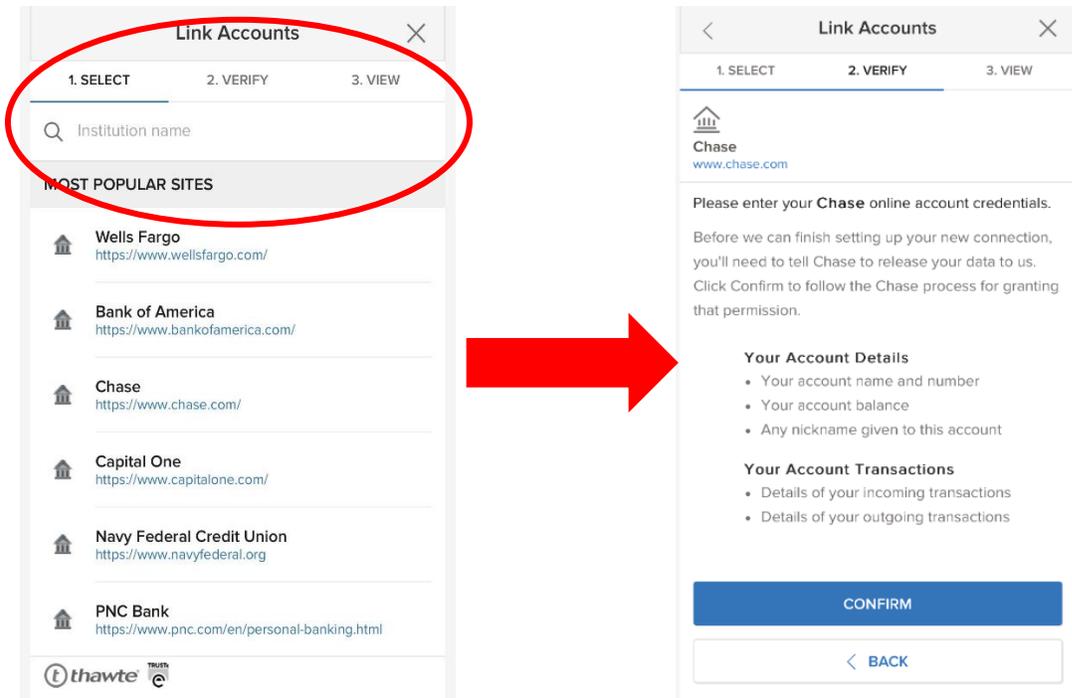

Once you have read the disclosure, select **Accept** to continue. After reading the overview on linked accounts and how your information is protected, choose **Get Started**.

Enrolling Other Accounts

On the next screen you can search for the financial institution you'd like to view within Salal digital banking. Once the institution is selected, you can review the information that will be available once

your accounts are linked. Selecting **Confirm** will open a new window to the financial institution's digital banking login screen.

To complete authorization, you will need to provide your login credentials for the accounts to be linked. Once the verification process has been completed, you will immediately see the accounts and balances from the new institution.

Note: Each institution will vary slightly. You may be asked for additional security measures from the other financial institution.

To repeat the process and link other accounts, choose **Link Another Site**. Once all accounts have been added, select **Close**. You may be prompted to allow your accounts to compile, followed by a screen displaying **Processing Complete**.

Select **Go to Accounts** and you will now see all the accounts registered alongside your Salal accounts.
